Advanced Web Map Assignment

Purpose: Use mapping to articulate a claim about a text or texts you are studying.
Difficulty: Hard
Time: 4 hours
Equipment:
      a. desktop, laptop, or mobile device
      b. easily accessible space on a web-server
      c. Either Mapbox Studio (free) or Zoomify Express ($9)
Evaluation: Projects will be assessed on their accuracy, their constructive articulation of a relationship between the content of this class and geography or physical space, and their careful use of a variety of evidence.

Advanced mapping assignment A
Using Mapbox and CartoDB, create an interactive map with an appropriate base map. Your map should use points, lines, or areas (polygons) along with descriptive material to make a compelling geographical claim or story about one of the texts or subjects we have been studying.

Advanced mapping assignment B
Using Zoomify and Knightlab's gigapixel story map tool, make a compelling spatial or geographical claim or story about one of the texts or subjects we have been studying.
